

SAMPLE CONTAINERS

- Ultraclear , polypropylene sample containers
- Thick walls for sturdiness
- LOCK SYSTEM: The external thread of the container has a small triple bridge type structure which while closing the cap comes in contact with the teethered structure present in the internal thread of the cap. This results in tight and secure locking of the cap.
- Clear embossed graduation marks for measuring
- Sterile containers are ETO sterile and come in individually wrapped packaging

Cat. Number	Description	Volume	Packaging	Type/Style	Qty. / Pack
